

Smart Trip Platform (STP)

A decentralized ecosystem that connects travellers and service providers and combines all the functionality needed for safe, comfortable, and authentic trips - leisure or business. Developed for use on computers, iOS and Android devices.

Functionality:

The Smart Trip Platform will provide an exceptionally wide range of services to both travellers and service providers: from airticket sales to booking jungle treks, from detailed information on local attractions to finding travel companions. The Smart Trip Platform will be both the ultimate trip planning tool and a dynamic community, serving as a source of crowd wisdom. A large array of additional free services - such as a voice translator, emergency assistance, etc. - will further enhance the user experience.

Travel business using the platform will be able to promote and sell their services (be it accommodation, excursions, car rentals, etc.) to a global audience and have a direct contact with their clients - all this while paying very low fees.

Why the best moment is now:

Global travel industry growth has been outstripping the world's GDP growth rate for a few years now and will continue to do so; experts agree that digital technologies will be the prime mover of this growth. The Smart Trip Platform will provide a hi-tech and secure solution to many issues of the travel market, such as high intermediary fees, lack of direct contact between travellers and service providers, the language barrier, and the difficulty for small businesses to enter the market.

Blockchain technology

Will guarantee secure data storage and transparency of all transactions. A series of smart contracts will ensure instant payments and efficient conflict resolution. The system will be mostly decentralized and community-run, with users able to freely add information on attractions and services, earning rating points in return.

TripCash is the official token of the Smart Trip Platform and will be used to carry out all internal payments. Users will be able to store both TripCash and a wide range of cryptocurrencies in their individual

Universal Cryptocurrency Wallet (UCW), instantly exchanging between them; at a later stage,

Debit Cards (Trip Cash Cards) will be introduced, making it possible to use TripCash and other cryptocurrencies to make online and offline purchases.

ICO DATES:

Pre-ICO Round 1 April-May, 2018

Pre-ICO Round 2 May-June, 2018

Main ICO Round 1 June-July, 2018

Main ICO Round 2 July-November, 2018

TOKEN SALE TERMS:

Token name: TripCash

Symbol: TASH

Token type: ERC20

Sale target: 3,000,000,000 TASH

Exchange rate: 1 TASH = 0,01 USD
